

Master Planning the Future of Private Clubs

Future success for Private Clubs depends on sound master planning. Major elements of improvement projects include:

- **Planning**
- **Feasibility Analysis**
- **Facilities Analysis**
- **Project Financing**
- **Implementation**

[Some of the key questions to be asked can be found here.](#)

Much more than an appraisal firm, GPA can help answer these questions in a productive and independent manner and can guide your club through the master planning process, making informed decisions with sound, independent advice. GPA can provide market, economic, membership, legal and design advice and counsel through both our extensive, in-house expertise and our strategic relationships with industry leaders in a variety of disciplines. We can be a “one stop shop” to assist clubs in these critical decisions.
